

ESSENZA

ESSENZA

A SWITCHBOARD WITH A UNIQUE AESTHETIC,
THE QUINTESSENCE OF DESIGN AND FUNCTIONALITY.

ESSENZA captures the idea of something fundamental and pure,
reduced to its simplest and most elegant form.

WHITE

*"White sounds like silence,
a nothing before the beginning".*

Vasilij Kandinskij

SAND

It is discreet, polite, refined and not ostentatious. He loves harmony, he loves to blend and become absent to highlight other shades. "Reassuring, it doesn't argue with any color. It's a color from another time."

Fabrizio Caramagna

BLACK

*"It's been forty years since I discovered that
the queen of all colors is black."*

Henri Matisse

WHY ESSENZA

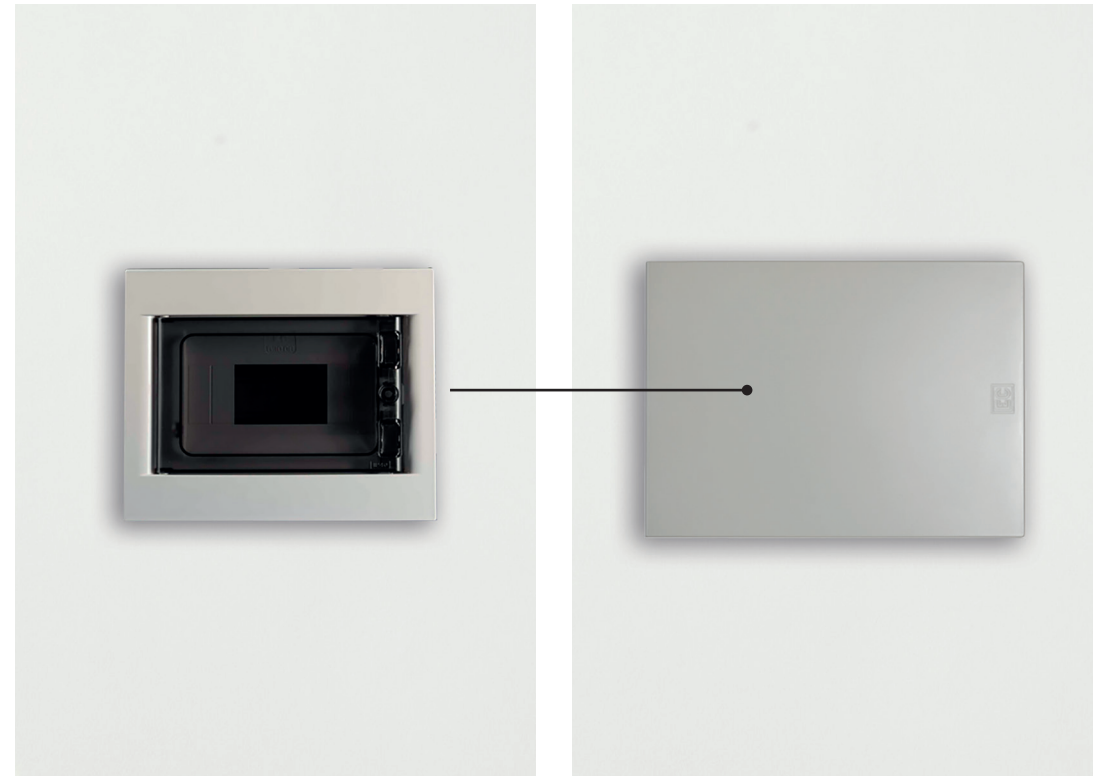

More than a functional component: an essential complement that **discreetly enriches any environment without imposing itself.**

Essenza is only 11 mm thick, and this is how a simple technical element such as this switchboard is transformed into a refined style element.

The **satín finish**, combined with various customization options, creates a contemporary aesthetic that enhances minimalism without sacrificing personality, blending **elegance and functionality in perfect balance.**

UPDATE THE STYLE OF YOUR HOME

ESSENZA can replace the enclosures of the 630 and 635 series as it can be mounted on the same flush-mount boxes.

SATIN FINISH

The satin finish of ESSENZA gives a touch of elegance and refinement to the aesthetics of the enclosure. 3 colors available: white, sand and black.

11 mm

Completely flat and only 11mm thick.

180° OPENING

The ESSENZA front door has an opening angle of 180°. The frame is reversible allowing opening from both sides.

2 VERSIONS

Available in two different module versions: 12 and 24 modules.
