## Description

The 3-way junction box is an essential accessory for creating T-shaped branches from straight trunking. The internal knockout, shaped to accommodate multiple dimensions, facilitates assembly, ensuring both a perfect appearance and the maintenance of the IP rating. It is also used for branches perpendicular to the baseboard itself or to connect the trunking to the floor. The internal grille, snap-on to the trunking and screwed to the wall, prevents any contact or overlapping of cables in the branches. To reduce from 130x28 to 70x20, use: EC20209 or EC20309.

## Etim

**GROUP EG000006 - Installation ducts for wall and ceiling**

**CLASS EC001940 - Transition piece for skirting duct**
